EXOGENI Experience

Our overall experience with ExoGENI is good, but we faced some issues while working on it and would like to highlight them.

- Not able to extend slice many times.
- Not able to reassign IP addresses to devices once reserved with IP addresses assigned.
- Contact with system is lost when rebooted.
- Resources are not available many times when tried to reserve systems.
- LLDP packets are not discovered naturally, needed to modify nearest hop MAC address.
